Report Overview: This publication on the Status of Women in Pickett County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

The Status of Women in Tennessee Counties

PICKETT

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Women in Pickett County have median annual earnings of \$17,173, ranking Pickett 94th out of the 95 counties. Though the county has extremely low median earnings, it ranks among the top 20 counties in wage equity with women earning 76.8% of men's earnings.
- ◇ Pickett is first among counties in female unemployment rate. 42.6% of women participate in the labor force and 48.0% of the county's labor force is constituted by women.
- ◇ Women in Pickett County are 20 percent less likely to hold a managerial or professional occupation than women in Anderson County. 24.1% of working women are employed in such occupations while 20.1% of all employed persons work in management or professional jobs.

Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ Pickett ranks in the worst 15 counties in four of eight economic autonomy indicators; however, Pickett ranks in the top 5 counties for the remaining four indicators.
- ◇ 62.9% of women have a high school diploma and the same percentage of all county residents have a high-school level degree. Pickett has a 0% female high school dropout rate.
- ◇ 6.3% of women and 9.1% of all county residents have a four-year college degree. Though equal percentages of men and women have bachelor's degrees, significantly higher percentages of men have four-year college degrees.
- ◇ Of women in Pickett County, 17.0% earn incomes below the poverty level and 4.5% of single, female-headed households live in poverty.
- ◇ Though 12.0% of families are in poverty in the county, 21.3% of families with a female householder and no husband present live in poverty.
- ◇ The percent of businesses that are women-owned in Pickett County is negligible, placing Pickett with Van Buren, Lake, Houston, Hancock, and Clay as last among counties in Tennessee.

The Status of Women in Tennessee Counties

ABOUT THE COUNCIL AND THIS REPORT

Pickett County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
